Welsh — *Good level* — ●●●○○

Dutch — *Basic* — ●○○○○

QUALITIES

Team spirit · Composure under pressure · Autonomy · Sense of responsibility

PROFILE

Final-year IT student at EPHEC. I build full-stack web apps with TypeScript, React and Next.js, from the relational database to deployment on a VPS. The restaurant kitchen taught me composure under pressure; American football, and the national flag football team, the Barbarians, taught me teamwork. I am looking for a small, close-knit team to learn in, and I am available for a four-month internship from February 2027.

PROJECTS

Oak Advisers — Client project

Website for a finance professional

- My first professional website, built in HTML, CSS and JavaScript and carried out end to end: discussions with the client, understanding their needs, development and delivery of the final product.

Tablify — School project

Reservation web app for restaurants and bars

- Table reservation management for the Horeca (hospitality) sector, driven by my hands-on restaurant experience. Built with Next.js and a PostgreSQL relational database, and deployed on a VPS.

Connected alarm system — School project

Web app + electronics

- Built as a team: design of the electronic circuit (custom PCB, Raspberry Pi) and development of the TypeScript control web app.

Computer network — My Italian Friends — Client project

Restaurant network infrastructure

- Design and installation of the restaurant's entire computer network

EXPERIENCE

My Italian Friends — 2023 – 2026

Student — Kitchen & IT infrastructure management · Waterloo

- Day-to-day management and maintenance of the IT infrastructure.
- Position of responsibility in the kitchen: organization and rigor during service.

McDonald's — 2020 – 2022

Student crew member · Waterloo

- Teamwork in a high-volume environment: handling rushes and strict adherence to procedures.

EDUCATION

Bachelor's Degree in Information Technology — 2023 – 2027

EPHEC · Louvain-la-Neuve

Learn to Code with Rust — In progress

Online course · Udemy
